

Maintenance Superintendents Association

Redwood Empire Chapter

Annual Workshop and Vendor Symposium
May 4, 2011

Rohnert Park Community Center
5401 Snyder Lane at the Rohnert Park Expressway
Rohnert Park

\$25 PER PERSON

Includes Workshops
Lunch and Vendor Show

[Contact Hours Available](#)

Registration 8:30 A.M. to 9:00 A.M.
Workshops 9:00 A.M. to 3:00 P.M.

**Exhibits, Demonstrations, Workshops, Vendor Displays, Equipment Show
and Lunch 11:00 A.M. to 1:00 P.M.**

Programs:

Morning Sessions (9:00 am to 11:00 am)

- **Manual on Uniform Traffic Control Devices (John Lester - 3M Co.)
Signing and Pavement Making Reflectivity**
- **OSHA Compliance, MSDS and Competent Person (Dan Felperin-Fresh Training Concepts)**
- **Storm Water Regulations and Environmental Permits and their Implications for
Maintenance (Steve Brady, Forest Frasier, Heaven Hix - City of Santa Rosa)**
- **Large and Small Diameter AWWA Tapping Machines (Josh T. Swanson-Mueller Company)**

Afternoon Sessions (1:00 pm to 3:00 pm)

- **Large and Small Diameter AWWA Tapping Machines (Josh T. Swanson-Mueller Company)**
- **OSHA Compliance, MSDS and Competent Person (Dan Felperin-Fresh Training Concepts)**
- **Biodegrade with Naturally Occurring Enzyme (Biopolymers) (Nick Scappini-StormKlear)**
- **Sewer Overflows and Backups: Latest in Best Management Practices and Regulatory
Compliance (David Patzer DKF Solutions Group)**

Reservations to: Lance Heide @sbcglobal.net or PO Box 11068, Napa, CA 94581

See attached registration form.

Vendor Equipment Show included 11:00am-1:00pm

BBQ Lunch included 12:00pm

WORKSHOPS

May 4, 2011

Program Descriptions

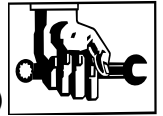

Morning Sessions: 9:00 a.m. to 11:00 a.m.

- **Streets - "Manual on Uniform Traffic Control Devices, Signing and Pavement Making Reflectivity" - John Lester - 3M Inc**

The presentation will discuss reflectivity as it relates to pavement markings and signing, including paints, epoxies, methacrylates, tapes, and more. Included will be information on application equipment, durability, reflectivity, initial and life cycle costs. Short update on MUTCD and were Caltrans stands in the process. (2 hr)

- **Water - "Large and Small Diameter AWWA Tapping Machines" - Josh T. Swanson-Mueller Company**

An in depth presentation of proper safety, tool and accessory selection when approaching a large diameter "hot tap" connection to a pressurized potable water conduit. This discussion will be followed by a live Demonstration of a large diameter drilling operation. The class will then conclude with a discussion of proper maintenance and storage of large drilling machines and accessories.

2 hr)

- **Stormwater - "Storm Water Regulations and Environmental Permits and their Implications for Maintenance" - Steve Brady, Forest Frasier, Heaven Hix - City of Santa Rosa**

Storm Water and Creeks Team implementing requirements of the City's MS4 permit for storm water discharges and designing development and municipal projects. City's MS4 permit compliance for storm water discharges. Biological and permitting support for capital improvement and maintenance projects. (2 hr)

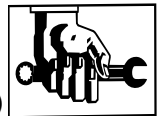

- **Safety - "OSHA Compliance, MSDS and Competent Person" Dan Felperin-Fresh Training Concepts**

One hour is MSDS review, terminology, and application. The second hour is Excavation/Trenching (Competent Person overview). There will also be quizzes at the end of each. (2hr)

Afternoon Sessions: 1:00 p.m. to 3:00 p.m.

- **Water - "Large and Small Diameter AWWA Tapping Machines" - Josh T. Swanson-Mueller Company**

An in depth presentation of proper safety, tool and accessory selection when approaching a large diameter "hot tap" connection to a pressurized potable water conduit. This discussion will be followed by a live Demonstration of a large diameter drilling operation. The class will then conclude with a discussion of proper maintenance and storage of large drilling machines and accessories.

2 hr)

- **Safety - "OSHA Compliance, MSDS and Competent Person" Dan Felperin-Fresh Training Concepts**

One hour is MSDS review, terminology, and application. The second hour is Excavation/Trenching (Competent Person overview). There will also be quizzes at the end of each. (2hr)

(2hr)

- **Stormwater - "Biodegrade with Naturally Occurring Enzyme (Biopolymers)" Nick Scappini-StormKlear**

StormKlear uses natural biopolymers that completely biodegrade with naturally occurring enzyme activity, thus no bioaccumulation concerns and has the capability of field residual testing to ensure polymer isn't being discharged at levels of concern. Match that those layers of safety with technology that works on any construction site soil, can be dose optimized onsite and verifiable performance at the end of the treatment and the result is a system that MAKES contractors WANT to use it, instead of having to use it!

Come Meet StormKlear's Nick Scappini and find out how this breakthrough in technology actually works!

(2 hr)

- **Wastewater - "Sewer Overflows and Backups: Latest in Best Management Practices and Regulatory Compliance" David Patzer DKF Solutions Group, LLC.**

The California Sanitation Risk Management Authority (CSRMA) is the recognized leader in California when it comes to state-of-the-art risk management practices for reducing the frequency and severity of sewer overflows and backups. Over the past 18 months, CSRMA and the State Water Resources Control Board have partnered to develop a suite of resources to help public agencies reduce the likelihood and severity of sewer overflows and backups. These resources range from SSMP audit tools to free online training modules to sewer use ordinance language. Join us and learn if your sewer system management and emergency response practices are in compliance and reflect the latest in risk management practices. (2hr)
